

# MECHANICS & DYNAMICS

Putting all the pieces together

**Reining. Dressage. Cutting. Jumping. Barrel Racing. Polo.  
Trail Riding. Racing. Roping. Driving. Eventing. Halter.**

Regardless of the sport you pursue or the goals you have with your horse, the primary aim of your horsemanship is the same – CONTROL.

As riders and aspiring horsemen, if we hope to join in harmony with our horse, we need to first understand the basic mechanics of his balance and movement. Without this understanding we could only hope to accidentally stumble upon anything refined or harmonious – and we'd surely lose it as quickly as we came to find it.

This DVD explores the physical connection between rider and horse, giving you valuable information to take to the trail or arena that will immediately increase your control and enjoyment.
